

Technology:

- VieWay is based on the state-of-the-art GPS, GSM/GPRS and GIS technologies.

Strong Acquisition Setting:

- Acquire by time interval, run mode and stop mode. You can set different Acquiring time interval.
- Acquiring position by distance vehicle travels to save.
- Acquiring position and I/O status by external I/O status change.
- Support over speed Acquiring.

Easy Installation and Fault Tolerance Design

- Single power input range from 8-35VDC suitable for any kind of vehicle and marine install.
- Solid state design, fault tolerance support system can handle exceptional condition. It suits to extreme weather and road conditions and continues operating several years online without maintenance compact and power saving modes support.

LCD/Keypad Support (Optional)

- LCD/Keypad to support two way message. 16 X 2 Text LCD, 6 command button input, backlight support.

Secure and Reliable TCP/IP Links

- Work with any private IP or public IP network architecture.

GPS Map-Live Video CAM Support (Optional)

- Support GT-CAM Live Video CAM.

General Specifications

- Hardware OS: Multitasking realtime.
- Power Input: 8-35V DC.
- Power Consumption: Less than 200ma

GPS Engine Specification**General:**

- Frequency: L1 Frequency(1575.42 Mhz).
- C/A Code: 1.023 Mhz chipping rate.
- Channels: 16 parallel channel.

Accuracy:

- Position: 5-15 meters.
- Velocity: One meter/second.
- Time: One point per second.

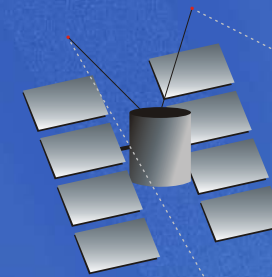

Protocol Support: TCP/UDP/DNS/POP3/SMTP.

Output Data: Name X, Y speed, heading, time, status, event code, I/O value.

Temperature Range: -25 degrees C to Plus 70 degrees C.

Dimension

- Compact size 120 X 35 X 56(mm), include housing.
- Weight is mere 250 gms.

Where am I Driving? Ask VieWay !

VieWay Solutions is an application service provider which provides comprehensive tracking solutions for automobiles to enhance business performance. The Company offers a nation wide, customized, cost effective and round-the-clock services to vehicle operators in tracking, monitoring, controlling and managing their fleet.

Technology used is GPS/ GSM/ GPRS compact size 120*35*56(mm) include housing, weight 250g

You are Better equipped with VieWay:

Easy to Use: It is easy to install VieWay on any vehicle (for example on dashboard with a minimum of 12V DC power supply from the vehicle's battery) and start monitoring on any general Internet connectivity (with sufficient bandwidth). VieWay enables the users to optimize their logistic management and enhance efficiency and profitability. Management of any number of vehicles is made simple from anywhere and anytime across the globe through minute by minute tracking ensuring security to the cargo, passengers and more so to the driver. The result is improved delivery schedules, minimized costs and ultimately customer satisfaction.

VieWay has a customized and user-friendly reporting structure which suits the user's necessities.

You Can't Afford Not to Have It !

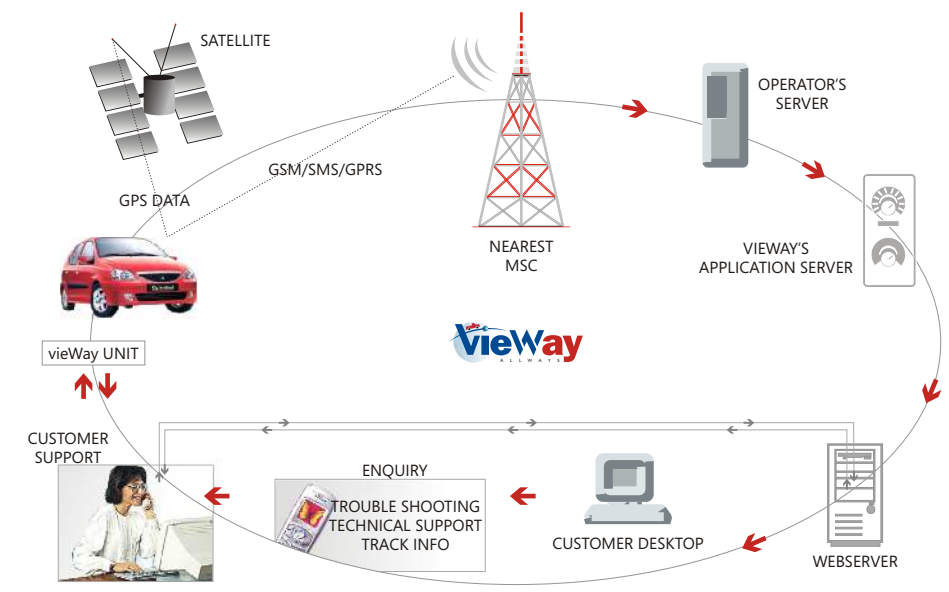

Minimal Maintenance: The VieWay solutions enable the users to use its expertise with minimal maintenance and nullify any additional infrastructure costs. The user saves investment costs by using 'plug and play' software with no necessity for expensive servers. VieWay Solutions provides you an online service through the Internet. The service and maintenance costs are unbelievably low for such a premium technology. It is as little as one rupee per head per month to ensure an employee's safety (For BPO, IT, ITES firms).

Raising User's Comfort Level ! The VieWay Advantage

VieWay Solutions is one stop shop for products, software and maintenance on GPS/GPRS technologies. It offers a risk-free support on maximized seamless roaming services across the country. The VieWay software encrypts & decrypts your precious data securely from end to end. VieWay solutions saves costs by integration of high-end technologies, systems and providing highly efficient software services. VieWay, the product, can be configured to frequencies beginning from 30 sec to 4 hrs or even more to meet the appropriate logistic requirements of the users.

VieWay Solutions provides the latest and flexible software compatible to any hardware with standard protocols. VieWay minimizes the efforts of the user in multiple accounting and billing processes by being a one-point contact for all the bills and payments.

FUNCTIONAL CHART

In the Forefront of Technology !

From Strength to Strength: VieWay Solutions is an integral part of an engineering services firm Aster Tele Services Pvt. Ltd. It was established in 1998 with a vision to achieve performance, excellence and set standards. Aster offers complete range of services from planning & design through operation & maintenance for telecom network and infrastructural development works. In a short span of time, the Company gained trust by providing dependable services, responding to changing needs and quality oriented value addition. With its presence throughout India and several other countries, Aster is geared up to provide services in tracking solutions to both industrial and commercial sectors through VieWay Solutions.

Hardware independent plug and play Software

Zero investment on any additional infrastructure

Knowing and managing your fleet movements anytime, anywhere on the globe
